What is Lead Retrieval?

Lead Retrieval is a vital tradeshow service that is essential to your success. All attendees visiting the show floor will have a name badge with a barcode. This barcode contains all of their vital contact information as well as any demographic data. Our Lead Retrieval Systems decode the barcode and store the information electronically for your follow-up use.

Why do I need a Lead Retrieval System?

Convenient for your sales team and your prospects-enables your sales people to quickly and easily capture your prospect's information without making them fumble for a business card or writing their information down. Organize your leads into one location and track those important buyers that visited your booth.

What are Follow up action codes?

Easy to use internal follow-up action codes categorize the follow-up activity required after the show to make the most of each show lead. Long after the show is over your lead information will remind you to "send literature," this one is "ready to buy," or "needs demo," "makes purchase decision," etc. Use the 10 generic action codes programmed into the Leads 2 Go™ or ask for customized codes.
